WORK EXPERIENCE

LOYALLI
MY PROJECT / AUGUST 2025 - CURRENTLY

Builded and shipped Loyalty Card application for iOS and Android, using Expo (React Native). Managed everything from business logic to project planning and architecture. Currently reaching 1,000 daily users with high retention, aiming for 10,000 DAU by end of Q2 2026. https://loyalliapp.com

STOMA HEALTH APP + STARTUP
MY PROJECT / MARCH 2025 - JULY 2025

Developing a global stoma care health application for iOS and Android (started mid 2025) providing physical and mental support. Project currently paused while awaiting approval from a European health funding program, following a deferral due to annual budget limits. Under NDA, further details restricted.

LITTLE SAVINGS
MY PROJECT / JANUARY 2025 - JULY 2025

Little Savings - A personal finance app helping users build better spending habits. Reached #36 in the Slovakia App Store with a peak of 12k registred users. Currently in maintenance mode with future development pending due to focus on other high-priority projects

REVUP
MY PROJECT / AUGUST 2023 - MAY 2025

RevUp was my project that unfortunately was discontinued. We made it to the Testing phase where I reached 15k active users, and about 30k registrd from all around World and strong support on Social Sites. Focused on Car Meets, providing an easy and intuitive way to see, attend, and manage events with features for anonymity

FULL STACK DEVELOPER
INVEST IN SLOVAKIA SPOL. S R.O. / JUNE 2024 - JANUARY 2025

Full Stack Developer at Invest in Slovakia (IIS), the leading real estate crowdfunding platform. Developed internal systems using React and NestJS to support investment operations and platform administration

FULL STACK DEVELOPER
INTERWAY, A. S. / JUNE 2023 - JUNE 2024

Contributed to various public-facing projects at InterWay, including banking and insurance sectors. Focused on frontend development with Java backend support. Some projects and partners are publicly listed on the company website of InterWay

FULL STACK WEB DEVELOPER
THISS S.R.O. / BRATISLAVA, SLOVAK REPUBLIC / JANUARY 2022 - JULY 2023

Started my career at Thiss, specializing in the MERN stack (MongoDB, Express.js, React, Node.js). Developed and implemented various web applications, including internal websites and diverse client-facing projects, from initial

concept to deployment.

FULL STACK WEB DEVELOPER

Automatic Transmission Service Website

This project involved developing a comprehensive website using HTML, CSS, JavaScript, Node.js, Express.js, SQL, and more. The site offered several features for users, including the ability to sign up, track their purchase and repair history, receive discounts through a newsletter, and more.

Although the company has since dissolved, resulting in the discontinuation of this project

EDUCATION

SELF-TAUGHT

IT

/

I don't have any degree in IT, but I have passion and years of experience working for clients, companies, or on my own projects. We live in a generation where a degree is mainly just paper, and where anybody can learn anything through real-world practice.
